Salon Echelon

The salon's signature pedicure features a luxurious massage, scrub, and hot towel treatment from skilled nail technicians. The spa pedicure makes use of a sea mineral exfoliating scrub, mask, and deep-tissue massage.

The Spa and Studio at East Wind

This spa offers a plethora of pedicure options, from the basic to the Essence of the Sound option, which indulges feet with nutrient-rich sea salt to alleviate tension. Other pedicure treatments sound tasty enough to consume—including Champagne & Roses, Almond Spa, and Warm Brown Sugar Delight.

Spa at Montauk Yacht Club

The highlight of the Spa pedicure here is a session in a warming booth (also known as a "toe sauna"), which infuses skin with moisture and nutrients. The hour-long service also includes a foot massage, exfoliation, and a special mask, custom-

EARTH FRIENDLY

Heal your toes and the environment at
27 Hampton Salon.

"We try to use earth-friendly and organic products in all of our manicures and pedicures," says Bianka Lefferts, the salon's founder. Instead of harsh acetone-based nail polish remover, 27 Hampton opts for Priti NYC's soy-infused, lemongrass-scented remover. In addition to the environmentally friendly accommodations, Lefferts takes pride in her customer service and the skill of her nail artists: "Our salon hires only the most talented staff from all over the world." She adds that 27 Hampton provides a relaxing and high-quality pedicure "with all the bells and whistles."
