

Bianka Lefferts
27 Hampton Salon
Southampton, NY

Get the Look:

- 1. This look is for girls with natural curls who want a more beachy wave. Combine a dollop of **Supershine Light Moisturizing Cream** and **Surfcomber Tousled Texture Mousse** and comb through the hair to prep. Add more product as you need, but be sure to use more **Supershine Light** than **Surfcomber**.*
- 2. Gently comb through the hair with a wide-toothed comb to ensure that the product is distributed evenly. Let the hair dry naturally or dry with a diffuser.*
- 3. Wrap random sections of hair around a 1-inch curling iron, focusing on the curls that are particularly frizzy or tight. Hold the iron horizontally rather than vertically and wrap the hair around the wand in an upward direction, hold for a few seconds and then let go. This will give you the perfect tousled beachy wave that will blend into your natural curls.*
- 4. To set the hair when you're done, spray **Soft Lacquer Heat Styling Spray** throughout the hair. Let it sit for 10 minutes or until it's dry, then gently run your hands through the curls to break them up. "**Soft Lacquer** has great memory—it's my go-to product," Bianka says. "I actually love using it as a finishing spray. Once you let it dry, you can do whatever you want and your hair will stay perfect. Just be sure to let it dry before touching it."*
